

beeswax

genuine quality
traceability
organic apiculture

Because of its nourishing ingredients, beeswax is a highly valuable resource for natural cosmetics. Containing secondary plant compounds, beeswax protects your skin naturally.

We source our organic beeswax exclusively from German beekeepers committing themselves to Bioland standards. Since we provide our partners' wax on the market, we offer them another source of income, next to honey.

We, thus, sustainably promote regional and ecological beekeeping.

origin. GERMAN ORGANIC APICULTURE
